Five Benefits of Our eLearning Services

Regulatory compliance
Our online training courses comply with the training requirements of international aviation authorities, such as the IATA and ICAO.

24/7 access to training, anywhere
AirportCollege.com courses are self-paced and training is available 24/7. Learners are not bound to a specific time or place to physically attend classes. Qualifications can be updated whenever needed.

Zero Emission Training
Our Training Service reduce paper waste, emissions and other training-related footprint by over 99% when compared to classroom training. We compensate the CO2 emissions incurred from the use of our online courses by our clients.

Cost-efficiency – gain up to 80% of savings
AirportCollege.com training service reduce various costs typically associated with classroom training. These include travel and accommodation, classroom or venue rental, printed learning materials and salaries. Studies indicate that eLearning has the potential to reduce training related costs significantly, by up to 80%.

Always up-to-date, multipurpose and customisable
We work with the leading experts in aviation industry to ensure that training content is relevant and always up-to-date. Our eLearning courses can be used for self-study, part of blended learning or as instructors' support material in the classroom. Course content can be customised to fit any company needs.

Our Global Partnerships

IATA Strategic Partner

Accredited Training Centre for ICAO/FIATA

Member of Airport Services Association (ASA)

Cooperation with ULD CARE

Strategic Partnership with Jettainer

Our Global Partnerships

Education Finland

Airport College International's is an official member of Education Finland, a national export programme offering Finnish educational know-how and learning solutions globally.

The Ministry of Education and Culture and the Ministry of Economic Affairs and Employment fund the programme.

There is a strong link is to the Ministry of Foreign Affairs and Finnish embassies around the world. The programme also collaborates with Business Finland and its trade offices globally.

Design from Finland Recognition

The Design from Finland mark may be awarded to a product or service designed in Finland, provided that the company has invested in Finnish design.

The company's head office must be in Finland. The product may be manufactured in Finland or abroad.

The right to use the Design from Finland mark is awarded upon application for a term of three years by an independent Design from Finland Committee with expertise in the field.

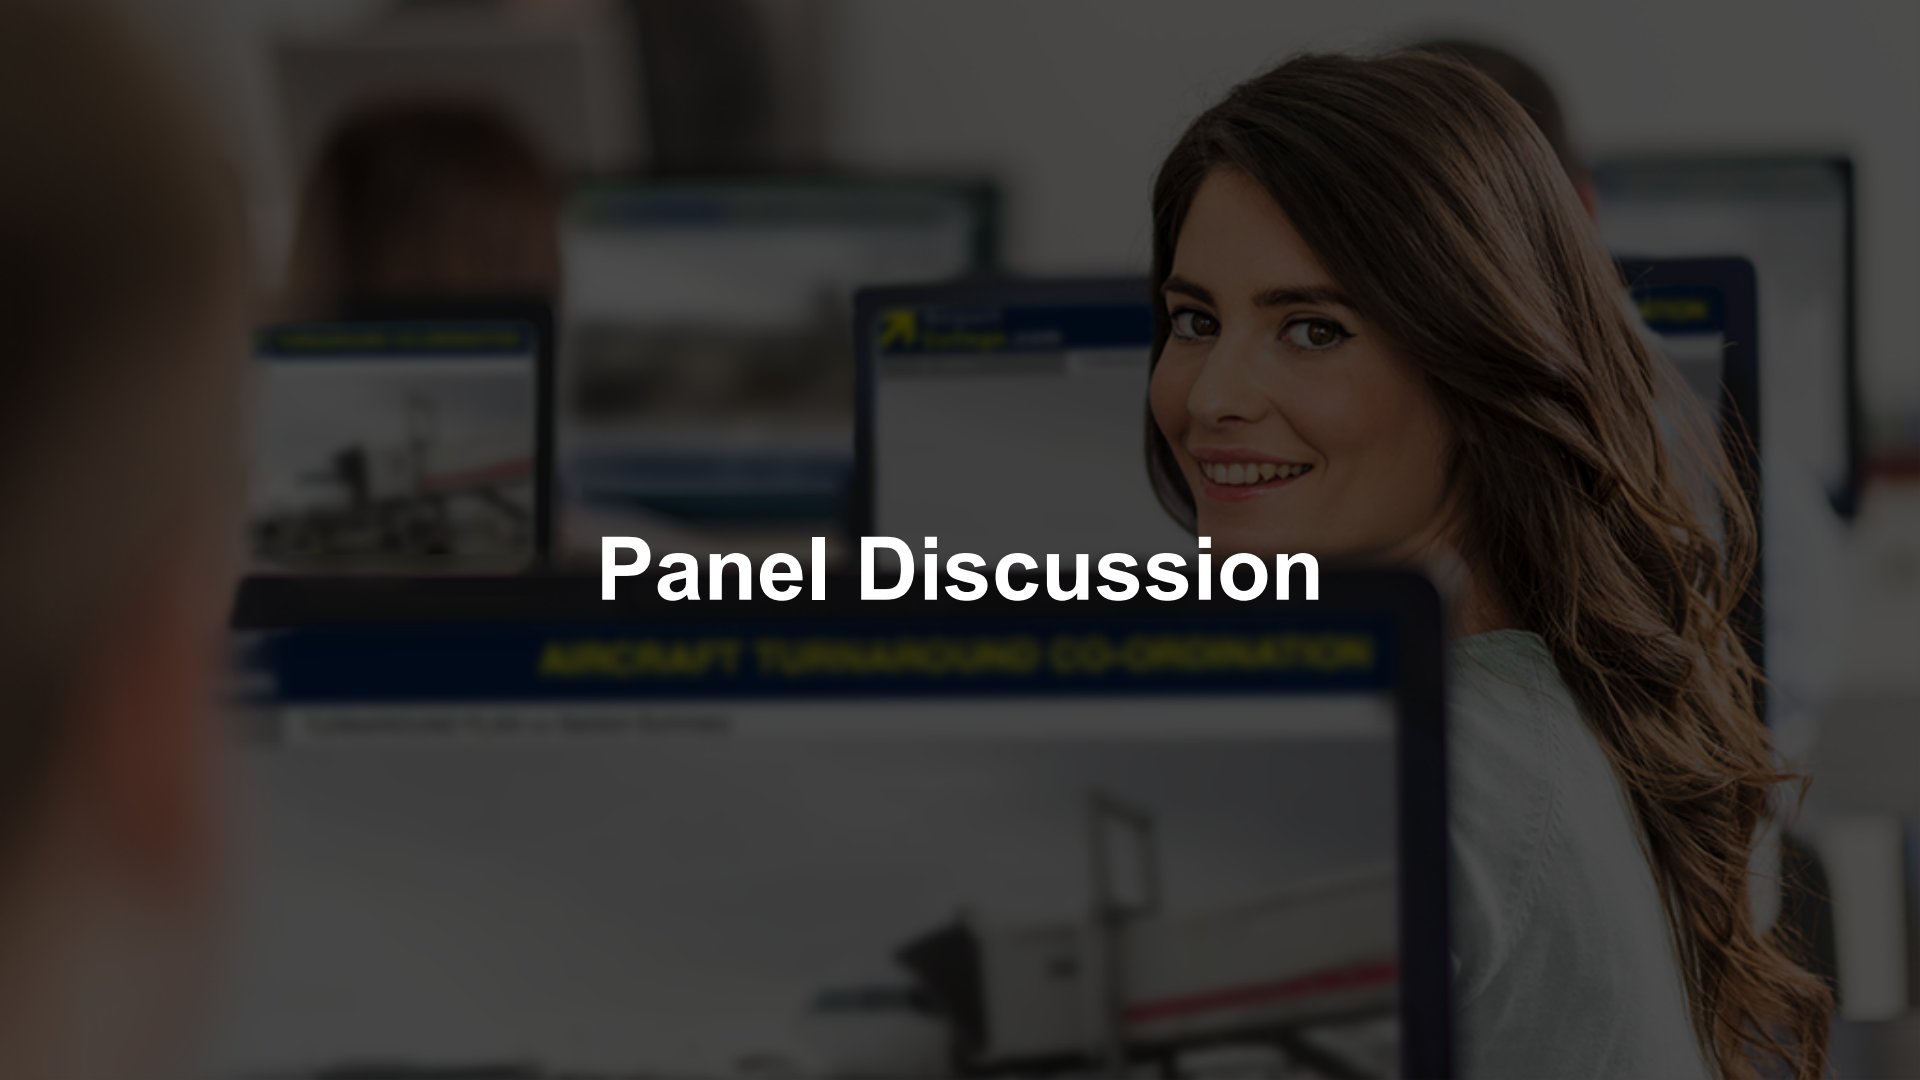
2. Co-operation with ULD Care
3. Panel Discussion



Panel Discussion

Panel Discussion

Smart ULD is only part of the story, the workplace also needs smart people

Panelists

1. Frank Mühlenkamp
2. Alan Glen
3. Chris Notter
4. Randy Chappell

Starting Point to Panel Discussion

The industry is aware of the enormous training challenge

The industry is aware of the enormous challenges of providing cost-effective and manageable training to the large number of high turnover employees working in ground handling and air cargo operations.

Questions to Panelists

1. How can the aviation industry achieve sufficient knowledge of ULD safety?

2. How to manage the cost-benefit calculation when it comes to training?

3. Both Fine Air and National Air Cargo pointed to poor training as a cause of the accident. Are we waiting for another accident to drive improved training?

4. Can modern training help in keeping employees in the company longer than now?

Questions to Panelists

1. How can the aviation industry achieve sufficient knowledge of ULD safety?
